TABLE

LAND SETTLEMENT

1 Occupation of Land	9
2 Alienation of Land	9

RURAL PRODUCTION

Data classified by Local Government Areas -

3 Rural Land Utilisation	10-11
4 Wheat and Oats for Grain (see also Tables 40, 41 and 43)	12-13
5 Barley for Grain (see also Tables 42 and 43)	14-15
6 Lupins for Processing and Feed and Rape for Seed	16
7 Hay (see also Tables 40-44)	17-18
8 Green Feed and Silage (see also Tables 40-44)	19-20
9 Vegetables for Human Consumption	21-4
10 Orchard Fruit	25-8
11 Apple Production according to Variety	29
12 Orange and Pear Production according to Variety	30
13 Vineyards : Area, Production and Variety of Vine	31
14 Production of Wine and Dried Fruits	32
15 Passion Fruit : Area and Production	32
16 Principal Pasture Seeds	33-4
17 Other Selected Pasture Seeds	34
18 Artificial Fertiliser Used	35-6
19 Crops and Pastures Irrigated (see also Table 45)	37
20 Irrigation according to Method (see also Table 45)	38
21 Cattle kept for Milk Production	39-40
22 Cattle for Meat Production and Total Cattle	41-2
23 Pigs	43-4
24 Poultry Numbers	45-6
25 Sheep	47-8
26 Breeds of Sheep	49-52
27 Sheep and Lambs Shorn and Wool Clip	53-4
28 Lambing	55-6
29 Ewe Matings for Lambing	57-8
30 Machinery on Rural Holdings : Selected Items	59-62

Size Classification -

31 Rural Holdings, according to Size of Holding	63
32 Holdings Growing Wheat for Grain, according to Area Sown	63
33 Holdings Growing Wheat for Grain, according to Production	63
34 Holdings Growing Oats or Barley for Grain, according to Area Sown	64
35 Sheep Flocks, according to Size of Flock and Location	64
36 Cattle for Milk Production, according to Size of Herd	65
37 Cattle for Meat Production, according to Size of Herd and Location	65
38 Pigs, according to Size of Herd	65

Five-year Summary -

39 Agricultural and Pastoral Statistics:	
Land Utilisation	66
Crops for Grain, Hay and Green Feed	66

39 Agricultural and Pastoral Statistics (continued):

Silage, Fodder Stocks and Stocks of Grain for Feed and Seed	67
Pasture and Lucerne Seed	67
Fertiliser	68
Irrigation	68
Vegetables	69
Orchards, Plantation Fruit and Vineyards	69-71
Nurseries	71
Livestock and Wool Production	71-2
Machinery	72-3

Miscellaneous Data -

40 Varieties of Wheat	74
41 Varieties of Oats	74
42 Varieties of Barley	75
43 Varieties of Wheat, Oats and Barley: Five-year Summary	75
44 Hay and Green Feed : Area of each Type Sown	76
45 Crops and Pastures Irrigated, according to Method of Irrigation	76
46 Breeds of Sheep	77

VALUE OF PRIMARY PRODUCTION

Explanatory Notes	78
Five-year Summaries -	

47 Value of Primary Production (excluding Mining)	79
48 Gross Value of Principal Commodities	80-1

Annual Average Values -

49 Wheat	82
50 Wool (Greasy)	82

Monthly Average Prices, Metropolitan Markets -

51 Fruit	83
52 Vegetables	84

METEOROLOGY

53 Meteorological Observations taken at the Bureau of Meteorology	85
54 Rainfall at Perth : Monthly and Yearly	86

76 Northern Schemes	100

CONVERSION TO METRIC UNITS OF MEASUREMENT

Quantity data originally expressed in imperial units in this publication are now (as far as possible) expressed in metric units of measurement. The factors which have been used in converting figures from imperial units to metric units (and the abbreviations used for the metric units) are shown below. In each case, the imperial unit is multiplied by the factor given.

Imperial unit	Conversion factor	Metric unit
acre	0.404686	hectare (ha)
cental	45.3592	kilogram (kg)
gallon	4.54609	litre (l)
gallon	0.00454609	cubic metre (cu m)
hundredweight	50.802345	kilogram (kg)
hundredweight	0.050802345	tonne (t)
mile	1.609344	kilometre (km)
pound	0.45359237	kilogram (kg)
ton	1.016047	tonne (t)

(NOTE. 1 tonne = 1,000 kilograms; 1 hectare = 2.5 acres approx.; 1 kilogram = 2.2 lb approx.; 1 litre = 0.22 gal approx.; 1 kilometre = 0.62 mile approx.; 1 cubic metre = 220 gal approx.; 1 millimetre = 3.94 points.)

ROUNDING OF FIGURES

Many of the figures appearing in the tables have been rounded to the nearest unit (e.g. hectare, kg, etc.) without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

Percentages appearing in Tables 40 and 43 have been corrected to the first place of decimals without making any adjustment which would be necessary to make the percentages so expressed add to precisely 100.

SOURCES OF INFORMATION

1. The statistics relating to agriculture and livestock appearing in this publication are, in the main, compiled from statutory returns supplied annually at 31 March by occupiers of rural holdings in Western Australia. A copy of the Agricultural Census return can be found at the back of this publication. Additional information is obtained from entirely separate collections covering slaughtering and bee keeping and from various authorities.

PERIOD COVERED

1. Data relating to area sown, production, yield per hectare and number of holdings growing crops are, in general, for the season ended 31 March. In cases where harvesting has not been completed by 31 March (e.g. potatoes, apples, pears, grapes) total production, including quantities harvested after 31 March, is recorded. A seasonal calendar showing approximate times of sowing or planting, harvesting, lambing and shearing appears on page 8 of this publication.

2. Livestock numbers and particulars of farm machinery are as at 31 March. Wool production is for the year ended 31 March and in some instances for the year ended 30 June. Egg production is for the year ended 31 March. Poultry and livestock slaughterings are for the year ended 30 June. Statistics of bee keeping relate to hives as at 30 June and production for the year ended 30 June.

DEFINITIONS AND EXPLANATORY NOTES

1. RURAL HOLDINGS - For statistical purposes a 'rural holding' is defined as a piece of land of one hectare or more in extent, used for the production of agricultural products (including fruit and vegetables, nursery plants, etc.) or for the raising of livestock (including poultry) and the production of livestock products. Holdings of less than one hectare on which commercial market gardens, nurseries, poultry farms or hatcheries are operated are also included.

An occupier who works more than one holding is generally required to supply a separate annual return for each holding, particularly if the holdings are situated in different local government areas. If, however, the holdings are not far apart and are worked as one, the occupier may (and in most instances does) supply a single composite return covering the holdings concerned. The holdings covered by a composite return are treated, for statistical purposes, as forming a single rural holding. Where a holding extends into two or more local government areas, the holding and all operations on it are attributed to the local government area in which the homestead is located.

2. AREA OF CROPS - The total area of land sown or planted to crops is shown irrespective of whether the whole area was harvested or whether a portion or the whole of the crop failed and was not harvested. In the case of fruit and vegetables, only commercial areas are included.

Where two successive crops are grown on the same land during one season, the land is included twice in area of crops except in Tables 3 and 39 where it is counted once only in land used for crops.

No data on the area planted to individual types of orchard fruits are collected but estimates, based on the reported total area of orchard and the number of trees of each variety planted, are made and shown in Table 39.

3. AVERAGE YIELD PER HECTARE - Figures appearing in this publication relate to average yield per hectare sown or planted. Areas of crops harvested are not recorded and consequently particulars of yields per hectare harvested are not available. In the case of apples, pears and oranges, yields are shown in terms of 'per hectare of bearing trees'.

4. EMPLOYMENT ON RURAL HOLDINGS - Details are collected in the Agricultural Census of persons working on rural holdings at 31 March. Although the employment information compiled from the Census has been published in previous issues of this publication, increasing difficulty has been encountered in obtaining data on a comparable basis from year to year. As these difficulties have become sufficiently serious to affect the validity of inter-year comparisons, information in respect of employment has been withdrawn from general publication.

5. LIVESTOCK SLAUGHTERED - Monthly returns are collected from principal slaughterers and these, together with annual returns from all other slaughterers (a special return from country butchers and the general census return from farmers and pastoralists) provide the necessary data for compiling estimates of all livestock slaughtered.

6. BUSHEL WEIGHTS - The production of fruit is generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation on account of such factors as method of packing and size and variety within each kind of product. The average bushel equivalent weights set out below may be used to convert production to kilograms.

Product	Weight per bushel	Product	Weight per bushel	Product	Weight per bushel
	kg		kg		kg
Apples	19	Lemons	22	Passion fruit	15
Apricots	22	Loquats	20	Peaches	20
Bananas	25	Mandarins	22	Pears	20
Cherries	22	Nectarines	23	Plums	26
Figs	20	Olives	25	Quinces	19
Grapefruit	19	Oranges	22	Tomatoes	20

7. CONVERSION FACTORS - The production of vegetables has been shown in reported units or in reported units rounded to the nearest thousand. The average unit equivalent weights set out below may be used to convert production to kilograms.

Product	Unit	Weight	Product	Unit	Weight
		kg			kg
Cabbages	crate	23	Rhubarb	bundle	11
Cauliflowers	dozen	23	Rock melons	box	18
Celery	doz heads	14	Silver beet and Spinach	doz bunches	7
Cucumbers	dozen	4	Sweet corn	doz cobs	3
Lettuce	crate	11	Tomatoes	$\frac{1}{2}$ bush case	10
Pumpkins	bag	51	Water melons	dozen	61
Radishes	doz bunches	5			

STATISTICAL DIVISIONS AND LOCAL GOVERNMENT AREAS

1. From 1929-30 Western Australian statistics of agriculture and livestock have been tabulated according to local government areas. In this publication, in the tables where information for separate local government areas is published, the district designations and names used are those which were current at 31 March 1974. No changes occurred during the season 1973-74. As the formation during 1972-73 of the Shires of East Pilbara and West Pilbara altered the common boundary between the North-West and Pilbara Statistical Divisions, separate figures for these divisions are not now available. Consequently, in this publication the component local government areas have been listed under the single heading 'North-West and Pilbara Statistical Divisions'. The changes to boundaries in these divisions are such as to make valid comparison of statistical data for the periods before and after the change impossible in respect of some of the component local government areas.

2. Local government areas of the State are grouped into ten Statistical Divisions and a table showing the Cities, Towns and Shires comprising these divisions at 31 March 1974 is shown on page 101.

3. Data relating to agriculture and livestock in local government areas outside the Perth Statistical Division which are designated 'Towns' are combined with those for the surrounding or adjacent Shire (except in the case of the Town of Bunbury, for which separate figures are shown). Thus, particulars for the Towns of Albany, Narrogin and Northam are included with those for the Shires of the same name; those for the Town of Geraldton with the Shire of Greenough; and those for the Town of Kalgoorlie with the Shire of Boulder. Separate statistics of agriculture and livestock are not compiled for the Cities of Fremantle, Melville, Nedlands, Perth, South Perth, Stirling and Subiaco; the Towns of Canning, Claremont, Cottesloe, East Fremantle and Mosman Park; and the Shires of Bassendean, Bayswater, Belmont and Peppermint Grove. Totals for these areas are shown in the relevant tables under 'Other districts' in the Perth Statistical Division. Separate statistics for the Shire of Exmouth are not available for publication. Information for that Shire has been combined with data for the Shire of Carnarvon.

4. In tables where data for Statistical Divisions and local government areas are shown, the former are indicated thus: PERTH; local government areas thus: Armadale-Kelmscott.

SPECIAL ANALYSIS

1. Size and Type Classification of Rural Holdings, Season 1968-69 - Special tabulations relating to the classification of rural holdings, by type of farming activity and size of principal activities, appear in a publication issued by the Commonwealth Statistician, Canberra, which is available for reference at the Office of the Deputy Commonwealth Statistician for Western Australia.

2. Tractor Classification, Season 1968-69 - Special tabulations relating to the classification of tractors by type of fuel used, horsepower and age of tractor appear in a publication issued by this Office. A range of tractor statistics for Western Australia was published in the 1969-70 issue of 'Rural Industries'.

3. Grain and Seed Harvesters at 31 March 1970 - A range of tabulations relating to the classification of grain and seed harvesters by type of harvester, type of front and width of cut appears in the 1969-70 edition of this publication.

4. Breeds of Sheep, Season 1973-74 - A special table relating to breeds of sheep by local government areas appears in this publication. There also appears a summary table for Western Australia showing details at 31 March 1968, 1971 and 1974.

5. Month of Shearing 1971-72 - A special table relating to the month of shearing by local government areas is published in the 1971-72 edition of 'Rural Industries'.

The following calendar is intended to show the main periods when principal agricultural and pastoral activities are carried out in Western Australia. Operations are generally confined to the periods shown but are subject to variation according to such factors as geographical location within the State, the variety of seed sown (or trees and vines planted) and exceptional seasonal conditions.

Item	Period	
	Sowing or planting	Harvesting
Pastures - Clovers Medics	April to June April to June	December to April December to April
Grain - Wheat Oats Barley Rye Sweet Lupins	May to mid-July May and June May to July May and June April to June	November to January November and December November and December November and December November to January
Hay - Wheaten Oaten	May and June April to June November to February	October and November October and November June to October
Cotton Linseed	May to July	December and January
Vegetables - Beans, Runner - Carnarvon area Perth Division Green Peas - For processing Fresh Potatoes - Early planting - Perth and South-West Mid-season planting - Perth, South-West and Southern Agricultural Late planting - South-West and Southern Agricultural	March to September August to March May to September May to September June and July July to November November to February March to November	May to November November to June October to December August to December October to December November to March February to June September to April
Onions Tomatoes - Carnarvon and Geraldton areas Other areas	February to August June to February	May to December October to June
Fruit - Apples Apricots Bananas Lemons Mandarins Nectarines Olives Oranges, Navel Oranges, Valencia Peaches Pears Plums Grapes - For table use For wine making For drying	June to August June and July September to March July and August July and August June and July July and August July and August July and August June and July June and July June and July July to September July to September July to September	February to May December and January July to June July to June May to September January and February March and April May to September August to February December to March February and March December to March January to May February to April February
Shearing and lambing - Shearing - Pastoral areas Agricultural areas Lambing - Pastoral areas Agricultural areas	March to August February to November April to July April to September	

Particulars	Area
	hectares
Absolutely alienated -	
Area sold by public auction or other forms of direct sale, or otherwise alienated, up to 31 December 1973	14,602,990
In process of alienation on 31 December 1973 -	
Free homestead farms	797
Conditional purchase	4,827,576
Agricultural land purchases	77,258
Town and suburban lots	649
Crown grants of reserves	30,169
Total	4,936,449
Total area alienated or in process of alienation at 31 December 1972	19,539,439
Leases or licences in force on 31 December 1973 -	
Issued by -	
Lands Department - Pastoral leases	98,975,077
Special leases	1,320,644
Leases of reserves	406,873
Residential lots	1,631
Perpetual leases	766,328
Mines Department - Gold-mining leases (a)	17,548
Mineral leases (a)	45,078
Miners' homestead leases	23,658
Forests Department - Timber permits (b)	1,154,557
Total area of leases and licences	102,711,394
Balance of area	130,299,167
TOTAL AREA OF WESTERN AUSTRALIA	(c)252,550,000

(a) Includes leases on private property. (b) Includes permits for cutting wandoo for tannin extraction, but excludes permits and licences for cutting timber and firewood in Goldfields area. (c) Area as determined in 1973 by the Division of National Mapping, Department of Minerals and Energy.

No. 2 - ALIENATION OF LAND: YEAR ENDED 31 DECEMBER 1973

Particulars	Holdings	Area
	number	hectares
Absolutely alienated -		
Auction sales -		
Town and suburban lots	480	162
Selections for which the issue of Crown grants was approved, the prescribed conditions having been complied with -

TRACTORS -					
Wheeled	32,120	31,917	31,809	31,970	32,381
Crawler	3,750	3,741	3,631	3,549	3,497
Total	35,870	35,658	35,440	35,519	35,878
MISCELLANEOUS MACHINES -					
Hammer mills (including roughage mills)	(e)	2,524	(e)	(e)	(e)
Milking machine units	9,144	(e)	8,401	8,529	(e)
Shearing machine stands	26,385	(e)	25,399	(e)	(e)

(a) See EXPLANATORY NOTES. (b) Excludes areas of sown pastures and of lucerne cut for hay or harvested for seed from 1971-72 to 1973-74. (c) Collected and published under the term 'established pasture' prior to 1971-72. (d) Included in land 'used for crops'. (e) Not available. (f) Not available for publication. (g) Includes Sudans, Sweet Sorghums, all Hybrid Sorghums, etc. (h) Not available separately prior to 1971-72. (i) Separate details not available; included in 'other crops'. (j) See footnote (i). (k) Includes superphosphate with trace elements. (l) Includes Urea, Anhydrous Ammonia, Ammonium Nitrate. (m) Not available. Prior to 1971-72 'trickle' was included in 'other and multiple methods'. (n) Includes beans for processing. (o) Includes peas for processing. (p) Comprises swede and white. (q) Area under bearing and non-bearing trees. (r) Includes spirit produced from distillation wine and used in fortification. (s) Excludes non-commercial nurseries. (t) Information on a comparable basis not available prior to 1971-72. (u) The value at the holding, after deducting cost incurred in marketing. (v) Includes steers, bullocks, etc. (w) Separate details not available prior to 1971. (x) Includes ewes intended for mating. (y) As reported on census returns for each preceding season; represents matings for lambing in years shown. Intended matings for 1973-74 are presented as a possible basis for forecasting the number of lambs to be marked for that season. In making such estimates, account should be taken of past relationships between intended and actual matings - see 'Lambing - Ewes mated' above. (z) Relates to livestock slaughtered at abattoirs and country butcheries and on farms and stations. Meat production represents dressed carcass weight. Excludes offal. (aa) Factory production only. See EXPLANATORY NOTES. (bb) Includes estimated equivalent of whole milk used in the production of butter, cheese, condensery, and other products. (cc) Includes headers and strippers; excludes reapers, binders and specialised clover harvesters. * Revised.

(Excluding Mining)

SOURCES

Value of production statistics for primary industries are computed by the Statisticians in each State, in accordance with the decisions reached at Conferences of Australian Statisticians. The data used are those concerning quantity of primary production together with information collected from various sources on prices realised in the principal markets for the different products, the costs of marketing those products and the costs of certain materials used in their production.

The method of collection of the prices realised for and the costs of marketing of the products of rural industries varies considerably between products. Where a statutory authority handles marketing of the whole or portion of a primary product in the State (e.g. Australian Wheat Board, Western Australian Egg Marketing Board, etc.) data are usually obtained from this source. Other information is obtained from market reports, from special returns collected from wholesalers, brokers, auctioneers and in some cases from farms, from annual manufacturing returns (showing cost of raw materials delivered to factory), from various transport records and from overseas and interstate trade statistics. There is also considerable variation between industries in the method of collecting information on costs of materials used in the process of production (no attempt being made to allocate these costs to individual products). In addition, accurate information on certain costs and for particular products or industries is very difficult to obtain.

For calculating value of production of the non-rural primary industries, information is obtained, in the case of hunting, forestry, and fishing, from annual manufacturing returns (showing cost of raw materials delivered to factory), overseas and interstate trade statistics, from fish auctioneers, merchants and processors and from State Forestry and Fisheries Authorities.

PERIOD COVERED

The period covered for individual rural industries is referred to on page 6 of this publication. Statistics for the non-rural primary industries included refer to the year ended 30 June. For primary industries included in these tables, values are in respect of production during the year (or season) irrespective of whether or when that production is actually marketed or when payments are made. For that portion of production not marketed (e.g. hay grown on farm for own use, etc.) estimates are made from the best available data.

DEFINITIONS OF TERMS USED

Gross Value is the value placed on recorded production at the wholesale price realised at the principal market. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the principal markets.

Marketing Costs comprise freight, cost of containers, commission, and other charges incurred in marketing.

Local Value is the value recorded at the place of production, and is obtained by deducting Marketing Costs from Gross Value.

Cost of Goods Consumed in the Process of Production covers seed and fertilisers used, pickling, sprays, dips, fodder consumed, fuel and oil, and other selected costs of a similar nature.

Net Value represents the return to the producer (farmer, pastoralist, fisherman, etc.) and is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income. It is obtained by deducting from Local Value the Cost of Goods Consumed in the Process of Production.

Gross and Local Values of primary production involve some duplication as they include the products of certain primary industries which are consumed as raw materials by other industries in the group (e.g. hay consumed by livestock). Furthermore, many of the materials consumed by primary industries are the products of secondary industry. However, duplication has been eliminated in calculating the Net Value of primary production by deducting the cost of both primary and secondary products consumed by primary industries. Therefore, Net Value of primary production should be used when comparing values of primary industries covered in this publication. It should be noted also that in some industries, principally Forestry and Agriculture (viticulture), there are some duplications in the measurement of components of certain activities which are covered both in the computation of Net Value for Primary Production and Added Value for the Manufacturing sector of the Economic Censuses.

(a) Figures revised since previous issue. (b) Separate details of lupins for processing or feed not available prior to 1971-72. (c) Hay all kinds. (d) Includes beans for processing. (e) Includes peas for processing. (f) Less than \$500. (g) Includes value of wool deficiency payments. (h) The value of sheep and lambs slaughtered has been computed from prices 'on hoof' at principal markets and therefore includes a value for wool on skins. Values of fellmongered wool and wool exported on skins have been estimated separately to arrive at a gross value for total wool production. (i) The value of calves slaughtered is included under Dairying. (j) Comprises net exports (overseas and interstate) of cattle and hides and skins from dead stock. (k) Prior to 1971-72, figures include milk used on farms. (l) Comprises net exports (overseas and interstate) of pigs and skins from dead calves. (m) Prior to 1971-72, figures include an estimate for non-commercial egg production. (n) Comprises value of whaling, pearling, molluscs and aquatic reptiles.

(a) For 6 months ended 30 June. (b) Appraised price (including adjustments) of greasy wool handled by the Central Wool Committee. * Revised.

No. 51 - MONTHLY AVERAGE PRICES OF FRUIT : METROPOLITAN MARKETS, 1973-74

(C)

NOTE . The average prices shown in this table have been computed from a systematic sample of auctioneers' records of fruit sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month does not reach a significant proportion of sales for the year, a price has not been shown.

STORAGE OF WATER

No. 58 - DAMS AND RESERVOIRS: STORAGE CAPACITY (a)

('000 cubic metres)

Dam or reservoir	Storage capacity	Dam or reservoir	Storage capacity
Canning Reservoir	93,420	Ord River Dam (Lake Argyle)	5,723,000
Churchman Brook Reservoir	2,182	Samson Brook Dam	9,165
Drakes Brook Dam	2,288	Serpentine Pipehead Reservoir	3,864
Fitzroy Dam	4,650	Serpentine Reservoir	177,300
Glen Mervyn Dam	1,491	17 - Mile Dam (e)	5,489
Harvey Weir	(b) 7,903	South Dandalup Reservoir	208,211
Kununurra Diversion Dam (c)	98,679	Stirling Dam	56,976
Logue Brook Dam	24,321	Victoria Reservoir	859
Mundaring Weir	77,127	Waroona Dam	14,931
North Dandalup Pipehead Dam	(d)	Wellington Dam	185,154
		Wungong Brook Diversion Weir	(d)

(a) At 30 June 1974. (b) Excludes flashboard storage. (c) Bandicoot Bar Dam or Ord River Diversion Dam. (d) Diversion weir only. (e) On Uralla Creek, an anabranch of the Fitzroy River.

METROPOLITAN WATER SUPPLY, SEWERAGE AND MAIN DRAINAGE

No. 59 - WATER SUPPLY, SEWERAGE AND MAIN DRAINAGE: SERVICES, ETC.

At 30 June -	Water Supply			Sewerage		Main drains
	Mains	Services	Meters	Sewers	Services	
	kilometres	No.	No.	kilometres	No.	kilometres
1970	5,340	193,359	171,346	1,590	76,638	227
1971	5,634	200,597	178,857	1,828	81,940	252
1972	5,936	210,465	187,313	1,991	87,318	254

1974	6,250	231,938	206,527	2,432	99,698	277

No. 60 - WATER SUPPLY: SOURCE AND DISTRIBUTION

Year	Supply according to source (a)			Distribution (a)		
	From reservoirs	From bores, etc.	Total	To all consumers (including shipping and railways)		Estimated population served
				Quantity	Services	
	cubic metres	cubic metres	cubic metres	cubic metres	number	number
1969-70	131,073,459	16,144,893	147,218,352	144,655,788	193,359	612,730
1970-71	137,821,537	12,017,816	149,839,354	148,077,926	200,597	633,396
1971-72	139,785,176	16,177,534	155,962,710	155,016,305	210,465	725,040
1972-73	147,111,250	17,695,512	164,806,762	156,757,393	222,393	729,400
1973-74	156,843,800	17,235,700	174,079,500	172,394,800	231,938	748,360

(a) The difference between total water drawn from all sources in any one year and the total distributed is comprised of operational loss at service reservoirs and the quantity released into Canning and Serpentine Rivers for settlers.

Source	Quantity supplied (cubic metres)				
	1969-70	1970-71	1971-72	1972-73	1973-74
Canning Reservoir	51,790,303	43,723,430	40,000,500	38,945,984	40,899,000
Churchman Brook Reservoir	2,389,880	4,661,061	3,131,710	1,741,156	5,001,000

(a) In addition to water supplies shown in the preceding tables, the operations of some local government authorities, and supplies by the Forests Department and sawmilling companies to mill towns, a number of privately operated water supply schemes serve towns in the North-West of the State. At 30 June 1974, 5 such schemes supplied water to 10 towns for a consumption for the year of 10,114,640 cubic metres. (b) Including supplies to railways, mines and shipping. (c) Connected to comprehensive water scheme during 1972-73.

NOTE. In addition to the preceding publications, a number of bulletins which deal exclusively with this State are produced by the Commonwealth Statistician, Canberra, who also issues many publications which contain particulars for Western Australia as a component of Australian totals. A complete list of all publications currently issued by the Central and the various State Offices of this Bureau appears in 'Publications of the Australian Bureau of Statistics' issued by the Commonwealth Statistician, copies of which are available free of charge from the Western Australian Office at the address shown on page 102.

Perth.

Area of the holding (in hectares) as shown
by our records. If changed, indicate in
Section A below.

Please amend Name and
Address if incorrect.

DUPLICATE

KEEP FOR YOUR RECORDS

AGRICULTURAL CENSUS SEASON 1973-74

This return is required under authority of the *Census and Statistics Act*, 1905-1966 and the *State Statistics Act* 1907-1956. Information supplied in individual returns is **CONFIDENTIAL AND FOR STATISTICAL PURPOSES ONLY** and will not be disclosed to any person or to any other Government Authority.

Please complete and return this form by 11 April 1974, or within 7 days of receipt, in the post-free envelope provided, to the **DEPUTY COMMONWEALTH STATISTICIAN**, 1-3 St George's Terrace, Perth, W.A. 6000.

W. M. BARTLETT

*Deputy Commonwealth Statistician
and Government Statistician*

GENERAL INSTRUCTIONS

- The occupier (owner, lessee or tenant) is responsible for the completion of this return. An occupier of more than one holding may submit a combined return if the holdings are in close proximity and are worked as one. If a combined return is submitted, attach uncompleted any other form received and indicate where the particulars relating to the holding specified have been included.
- Include **ALL CROPS GROWN** during the 1973-74 Season and **ALL LIVESTOCK** on the holding at 31 March 1974. The **TOTAL PRODUCTION** of the holding should be included whether sold, held for sale, retained for seed or other use on the holding, or otherwise disposed of.
- Where a holding has been wholly disposed of, figures given should relate to the period up to the date of disposal. Where part of the holding has been disposed of, figures given should include that part up to the date of disposal.

A. CHANGES IN AREA OF HOLDING between March 1973 and March 1974

(either by sale, transfer, rent or lease. If space is insufficient please give details on a separate sheet.)

—CUT FOR GREEN FEED OR SILAGE		9591			

5. CLEARED LAND AND SALT AREAS

INCLUDE land used for crops, fallow, pastures and other cleared land.

Total Area of Cleared Land on Holding at 31 March 1974
Area Under Long Term Fallow (about 6 months or more) during 1973-74 Season
Area of Salt affected land at 31 March 1974 which was previously used for crop or pasture

16	Hectares
6001	
6511	
8531	

6. CROPS Season 1973-74

- 1. Include total area and production of crops worked wholly or in part by sharefarmers or others.
- 2. Complete failure of any crop should be denoted by 'F' in the production column, but the area of crops that failed should still be shown according to the original intention of the grower. Areas of wheat, oats, etc., resown after germination failure should be included only once.
- 3. A crop on which livestock have grazed and which has been subsequently harvested for grain or hay, should not be included in areas fed off.
- 4. Where two separate crops have been grown on the same area at different times during the year, include area sown against each crop.
- 5. Report only area of crop harvested or to be harvested in 1974. Production will be asked for at a later date by special circular.

NOTE: To convert imperial units to metric, divide by the factor shown below

CEREAL CROPS

Show total grain production of each cereal, including grain disposed of, held in storage, or retained for seed or stock feed.

Wheat—For Grain (Divide bushels by 37)
—For Hay
—Fed off, or Cut for Green Feed or Silage
Oats—For Grain (Divide bushels by 55)
—For Hay
—Fed off, or Cut for Green Feed or Silage
Barley—For Grain (2-row)
—For Grain (6-row)
—For Hay
—Fed off, or Cut for Green Feed or Silage
Rye (not Rye Grass)—For Grain (Divide bushels by 37)
—For Hay
—Fed off, or Cut for Green Feed or Silage
Maize (1974 harvest)—For Grain (Divide bushels by 39)
—Fed off, or Cut for Green Feed or Silage
Grain Sorghum (1974 harvest)—For Grain (Divide bushels by 37)
(Report Forage Sorghum below) —Fed off, or Cut for Green Feed or Silage
Millet—Fed off, or Cut for Green Feed or Silage

12. VEGETABLES
GROWN FOR
SALE FOR
HUMAN
CONSUMPTION

1. Where harvest is not yet complete, please state total production expected to be harvested (except for late crop potatoes where production will be asked for at a later date by special circular).
2. Where two or more crops of vegetables are grown on the same area during the year, the area should be shown for each crop.
3. Where vegetables are grown between rows of trees in an orchard, estimate the area sown to vegetables.
4. Include area of vegetables that failed completely or were not harvested for other reasons.
5. Vegetables for animal feed should be shown in section 6 (item 7491).
6. Vegetable areas should be reported in decimals as follows:

This image shows a blank ledger page with four vertical columns and 20 horizontal rows. Each row contains a series of dots for data entry. The columns are defined by solid vertical lines, and the rows are defined by horizontal lines. The dots are arranged in a grid pattern, with each row having a series of dots across the four columns. The page is otherwise empty, with no text or other markings.
